Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Leuthold et al. (US 5933554, cited on a previously mailed PTO-892).

Claim 1: Leuthold discloses an optical function device (see fig. 10) comprising: a first port **2**, a second port **3**, a third port **7**, a fourth port **1**, a first splitter **111** branching the first port to a first arm **5** and a second arm **6**, a second splitter **112** branching the second port to the first and second arms, a third splitter **116** branching the first arm to the third port, a fourth splitter **113** branching the first arm to the fourth port, a first semiconductor optical amplifier (SOA) **114** disposed between the third and fourth splitters on the first arm, a second SOA **118** disposed between the first and second splitters on the second arm, and a phase control element **115** disposed between the second and fourth splitters **112** and **113** (respectively). It is noted that the nonlinear material **114** (or **118**) may be provided in the form of a semiconductor optical amplifier as discussed e.g. at col. 1 lns. 48-64 and col. 17 lns. 41-43.

Claim 3: In addition to the parts identified above with respect to claim 1, the fig. 10 Leuthold device also includes a second phase control element **119** disposed between the second SOA **118** and the second splitter **112** on the second arm.

Claims 2 and 4: The fig. 10 device is used as a wavelength converter (see e.g. col. 11 lns. 60-64).

Response to Arguments

The remarks accompanying the July 18, 2006 amendment are persuasive to the extent that the previously applied references do not disclose or suggest the elements added to claims 1 and 3 as amended. The previous rejections have been withdrawn accordingly. However, a previously cited reference is newly applied in this Office action.

Conclusion

Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
